Co-Founder

WE **STAND** OUT FOR

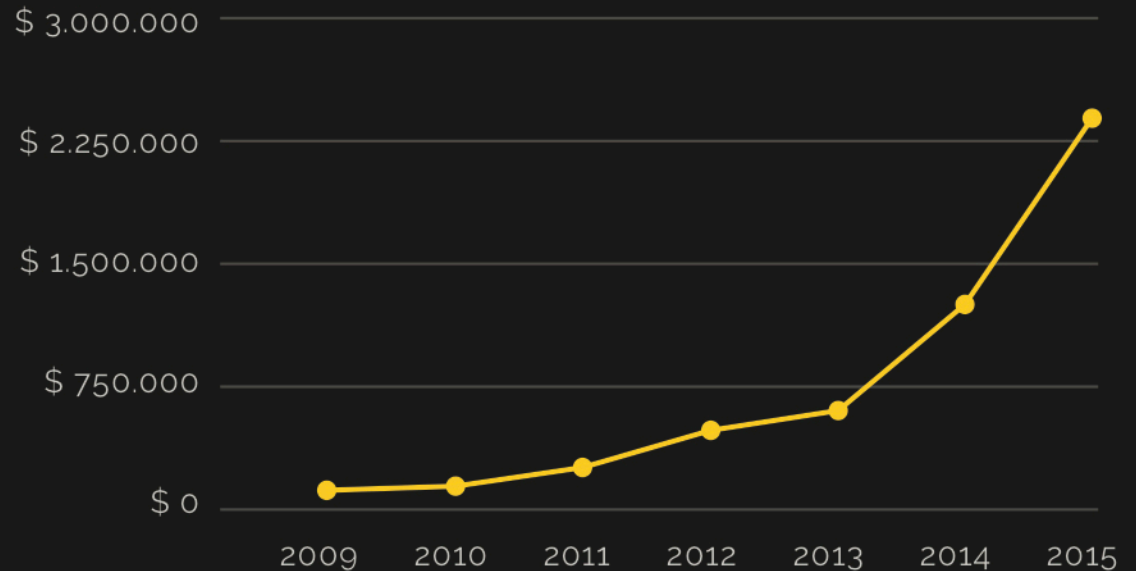

- Unique competencies in a wide field of development services
- Close relationships with universities in Estonia and tech communities around Europe
- Long term experience in special projects involving rapid product and innovation development
- Unique position in regional market as the fastest growing development house, having achieved near 100% growth year-on-year since establishment

Mooncascade continues to be the market leader in software and product development in the region, having a team of 70 specialists with deep technical knowledge and wide business development expertise to solve complex tasks for various needs.

**YEARLY TEAM SIZE**

**YEARLY REVENUE**

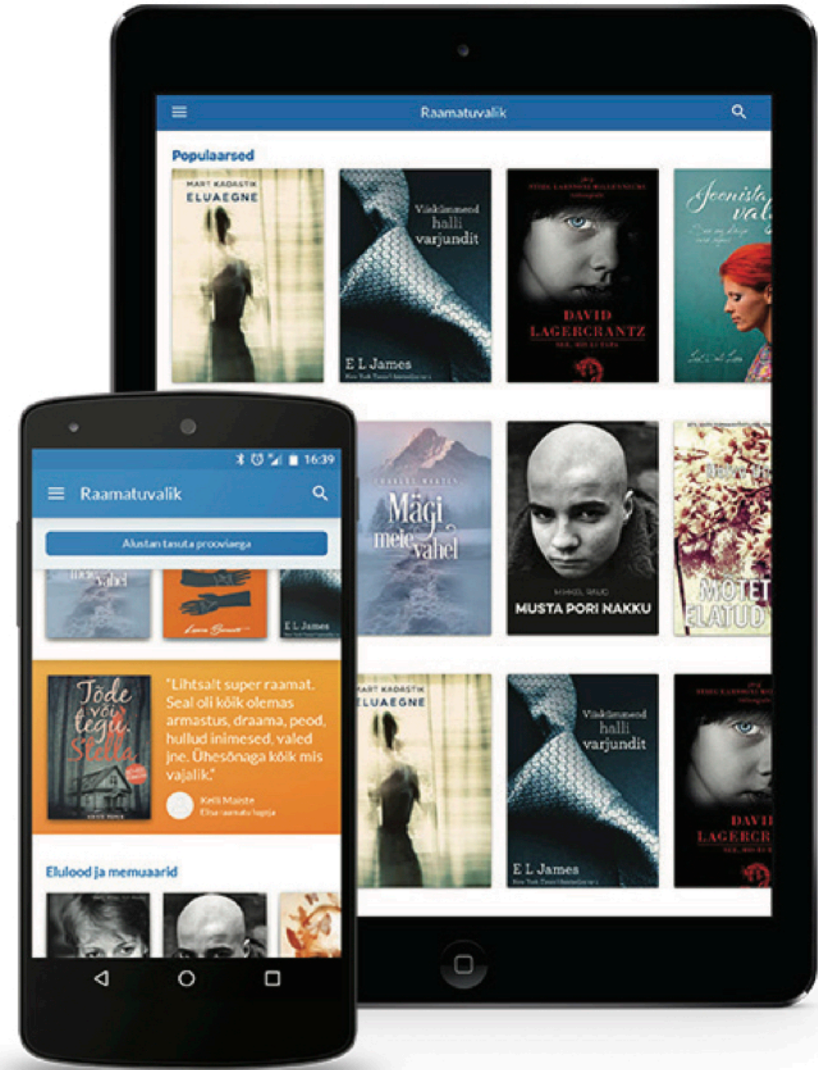

Our main competencies include complex architecture systems development, big data, machine learning as well as iOS, Android, Windows Phone, web and backend development.

THE **RESULTS**  
OF OUR WORK

# Elisa Books

Elisa's subscription book-reading service is one of the few in the world and the only telecom in the region to enter the e-book market. Instead of offering its customers a pay-per-item book app, the solution allows users of the app to read as many books as they wish for a fixed monthly fee.

# Tele2 Estonia App

Created for both private and business customers, the app is in continuous development to add new and innovative features regularly.

# Telia Various Apps

Telia is the largest mobile network operator in Sweden and Finland.

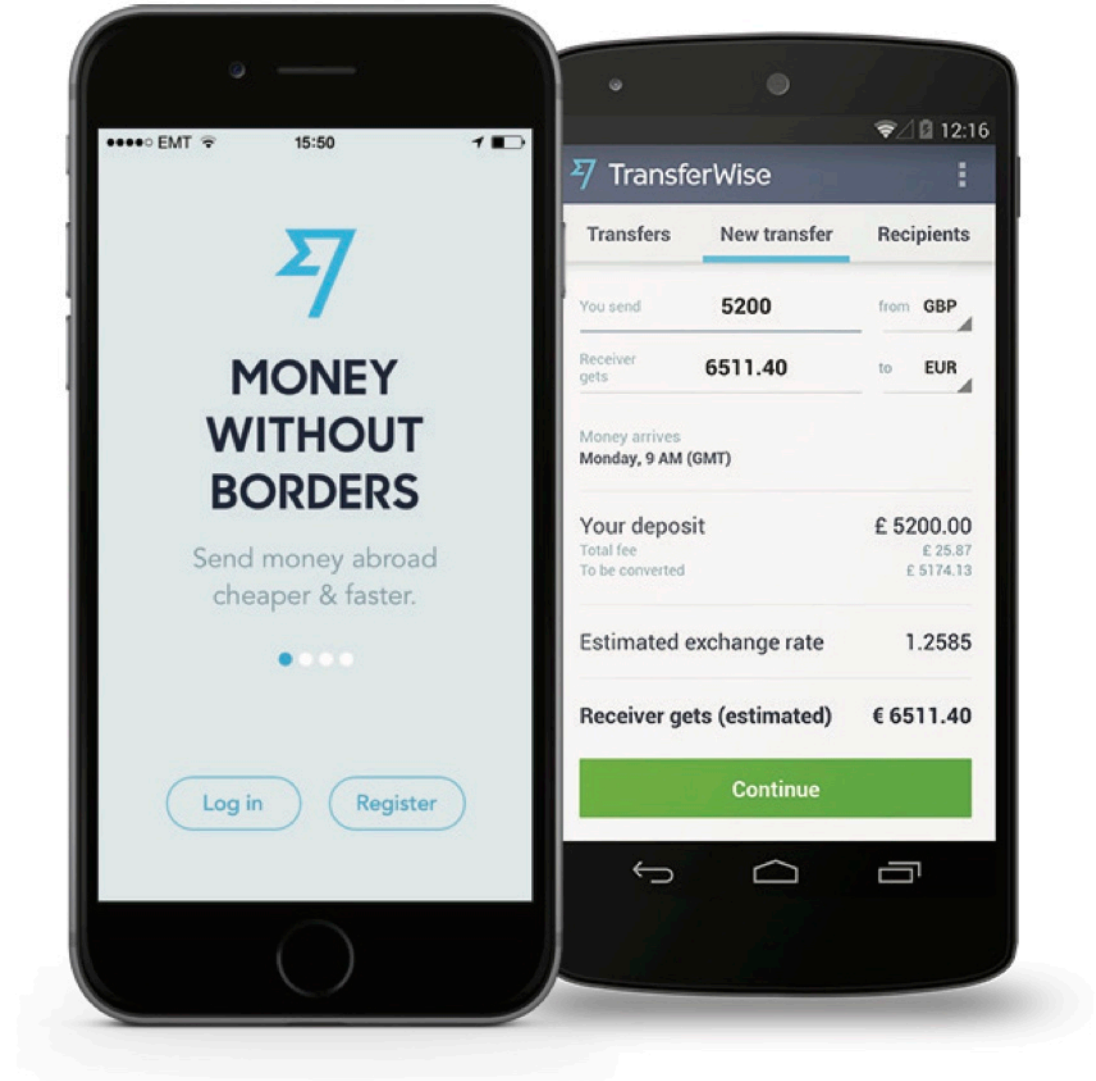

Mooncascade has the pleasure of working with them on their apps and the first one to launch was their self-service application for multi-markets (SE, NO, DK, FI, IT).

# TransferWise Apps

Having secured \$90m in funding from people such as Richard Branson, Peter Thiel and Andreessen Horowitz, TransferWise is the global disruptor of money transfer services.

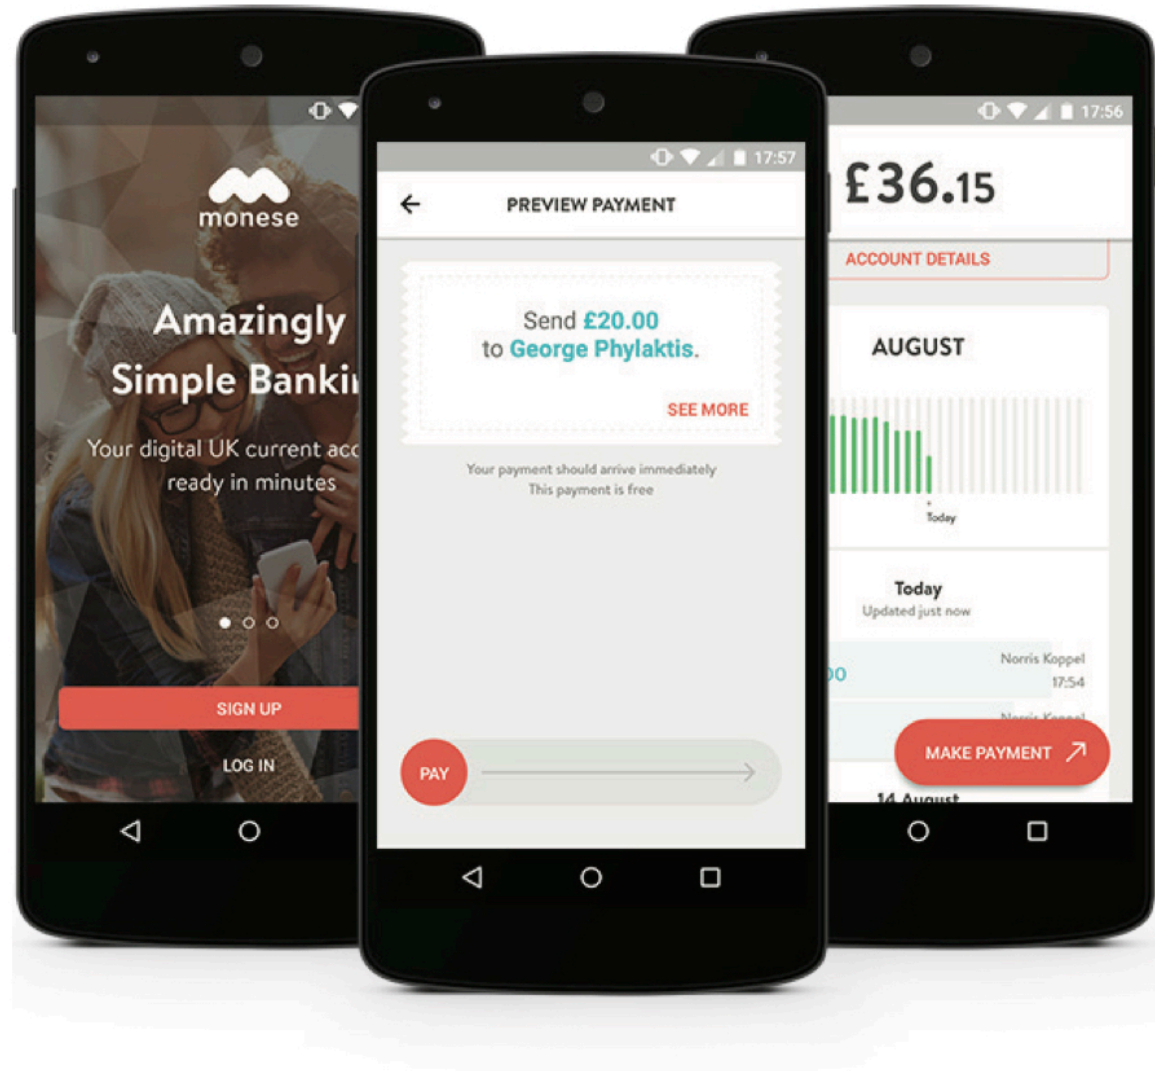

TransferWise is a tool for exchanging currency and making foreign payments with order-of-magnitude less expenses than by traditional banking means.

# Monese App

Featured in The Guardian, TechCrunch, Business Insider and TNW, this is the future of banking on the go.'

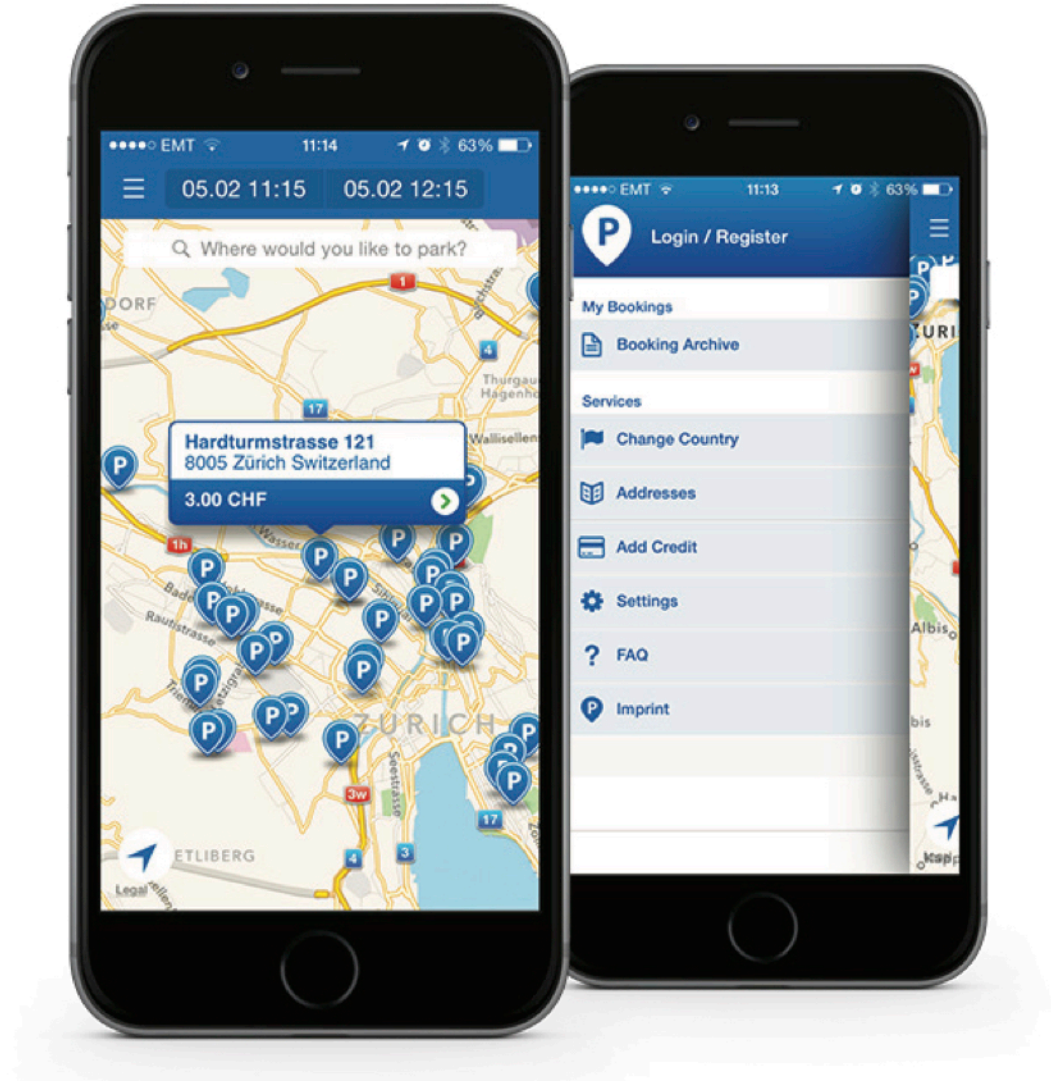

Mooncascade is the development partner of Monese.

# Parku Apps

Parku is the first parking-sharing company with a European vision, it is constantly being expanded throughout Europe. The service allows people to rent out their parking spaces and users of Parku to find parking easily and pay conveniently through the app. All Samsung phones in Switzerland come pre-installed with the app.

Mooncascade is the development partner of Parku.
