The World is Full of Problems to Solve!

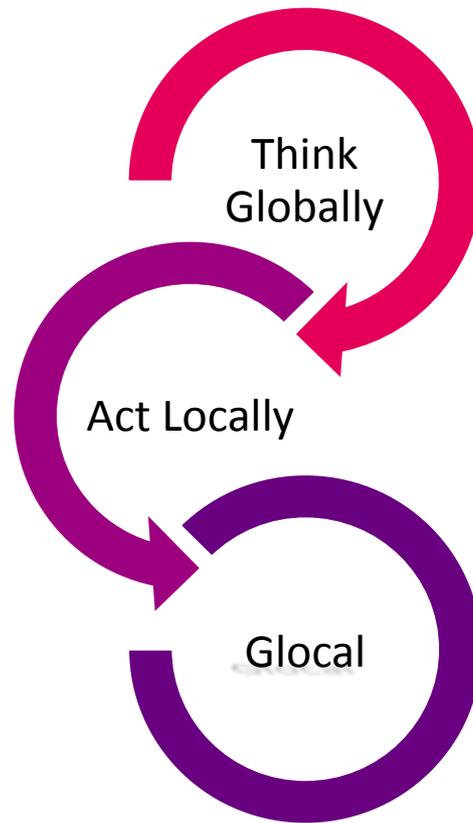

Source: United Nations Foundation

Global Goals, Local Problems ...

Adaptation of Global Solutions to Local Contexts

Virtual Exchange

Challenges to Virtual Exchange

- > Faculty resistance (e.g., time consuming to record lectures, new technologies, etc.)
- > Matching interests (e.g., complementary skills across institutions?)
- > Quality assurance
- > Coordination issues (e.g., technical support, timing, fairness, etc.)
- > Administrative concerns (e.g., credit recognition, registration issues, etc.)
- > Funding issues (e.g., travel funding, technological support, etc.)

Reward > Risk

Bringing the global to the local, and vice versa, is critical to the achievement of global goals!
