

Call for Contributions

Responsible Management Education Research Conference

29/30 October 2014, Chur, Switzerland

Dear Colleagues,

The Principles for Responsible Management Education PRME Regional Chapter DACH has the pleasure to invite you to attend the conference entitled

The Future of Responsible Management Education

that will be hosted by the University of Applied Sciences HTW Chur. The goal of the conference is to create a forum for on-going research on the manifold initiatives and measures undertaken to implement PRME in business teaching for the future we want. While it aims at fostering exchange by connecting emerging as well as extant PRME chapters and working groups it will also cater to a wide audience ranging from academics to practitioners eager to advance their knowledge and skills integrating responsible management and sustainable development into their professional efforts.

A fastidious and varied program will be offered including distinguished keynote speakers as well as interactive sessions on theme-focused work streams around RME. There will be many parallel sessions organized that cover a broad spectrum of topics including curriculum change and faculty development, poverty reduction and social business, anti-corruption, food and agriculture, climate change, green economy, and sustainable innovation. A unique framework program will complement this conference.

We invite you to contribute to topical themes and encourage authors to organize specific sessions.

Our choice for this venue is the Alpine City of Chur, Switzerland's oldest city, nestled in the Rhine valley surrounded by its magnificent scenery of mountainous summits inspiring numerous discoveries in culture and in the outdoors alongside its charming hospitality.

We look forward to receiving your contributions and will be delighted to meet you in Chur!
